---

Hi Cami, Kristine and Elizabeth. Here's some information for the call tomorrow.

Senator Merkley's office participants:

Jake Oken-Berg, Business Liaison, Portland office

Adrian Deveny, Legislative Assistant

Tim Brown, Legislative Fellow, Science

Maria Givens, Fellow, covering tribal issues

They have asked if EPA has contaminant concentration and exposure estimates for each (or some) of the 13 Sediment Decision Units for each cleanup alternative following active remediation, or if those estimates are available only for the entire site.

They want to "make sure our staff is all on the same page with EPA about what we do and don't know about contaminant concentration and exposure estimates (and associated human health risks) after active remediation under each cleanup alternative – **especially as it relates to the specific key Sediment Decision Units (SDUs) referenced in the attached EPA map.**"
